

Vitalize Breeding Plus

Avelsfoder

Ergänzungsfuttermittel für Pferde

In particular in-foal mares and lactating ones as well as foals need high amounts of high-quality nutrients. The increased protein content of our Vitalize Breeding Plus and hydrothermally expanded grains ensure an optimal supply of the organism with important nutrients and energy. Vitamins, minerals and trace elements are tailored to the increased needs of horses at stud and ensure adequate care for your horse. The high-quality amino acids support the fertility and milk production of mares, the sperm production of the stallions, as well as regulated growth of the foals and weaners.

The addition of AO-Ferm™, a fermentation product of the *Aspergillus oryzae* fungus, has a prebiotic effect and is intended to increase the digestibility of crude fibre and starch. The nutrients ingested in the feed can be better absorbed and used by the body. As a prebiotic, AO-Ferm™ is the food for living microorganisms in the horse's digestive tract. The growth and the multiplication of the good microbes in the intestine can be stimulated and an optimally utilised digestion of the nutrients can thus occur.

The combination of selected, high-quality raw materials in combination with the addition of AO-Ferm™ ensures optimal support for the mare in foal and prepares the best possible birth. The healthy, optimum development and care of the foal in the womb can be ensured. Vitalize Breeding Plus ensures high-performance broodmares, fertile stallions and a high level of vitality for foals and weaners.

The benefits at a glance:

- demand-optimised composition of high-quality proteins, vitamins, minerals and trace elements
- with the prebiotic AO-Ferm™ for optimised nutrient absorption and more effective digestibility
- balanced protein / energy ratio
- adjusted calcium / phosphorus ratio
- optimal supply of nutrients for mare, stallion, foal and young horse

Foderanvisning: Pregnant mares from 9th month: 300 g per 100 kg body weight per day, until 11th month: 500 g per 100 kg body weight per day, 1st - 3rd lactation month 500 g - 650 g per 100 kg body weight per day. With smaller quantities, we recommend adding a mineral supplement. Foals should only be given the muesli from their 4th week of life.

Sammansättning: 18,3 % Havre, 16,5 % Korn (flingor), 13,5 % majs (flingor), 11,1 % vetekli, 7,9 % ångbehandlat extr. soja skrå, 6,4 % betmelass, 4,0 % Havreskalkli, 3,8 % linfrömjöl, 3,8 % Solrosfrömjöl, 3,0 % Ärtor (flingor), 2,9 % sockerbetor-massa pellets, 2,6 % Kalciumkarbonat, 2,1 % Luserngrönmjöl, 0,8 % mariatistelolja, 0,8 % Dikalciumfosfat, 0,8 % majs (krossad), 0,5 % natriumklorid, 0,5 % Korn, 0,1 % Product from *Aspergillus oryzae*, high in protein, 0,1 % magnesiumoxid

smältbart protein (vRp): 121,4 g/kg
prececal digestible protein (pcvRp): 96,5 g/kg
smältbar energi foder (MJ DE): 11,4 MJ DE/kg
Metabolizable energy (MJ ME): 10,0 MJ ME/kg

Analysgaranti: 15,00 % Råprotein, 3,70 % Råfett, 8,00 % Växttråd, 8,00 % Råaska, 1,50 % Kalcium, 0,60 % Fosfor, 0,25 % Natrium, 0,25 % Magnesium, 28,00 %

Stärkelse, 5,00 % Socker

Fodertillsatser per kilo: 15.000 I.E. Vitamin A (3a672a)^{NA}, 1.500 I.E. Vitamin D3 (3a671)^{NA}, 300,00 mg Vitamin E (3a700)^{NA}, 60,00 mg Vitamin C (3a312)^{NA}, 3,00 mg Vitamin B1 (3a821)^{NA}, 4,00 mg Vitamin B2 (3a825i)^{NA}, 2,00 mg Vitamin B6^{NA}, 30,00 mcg Vitamin B12^{NA}, 30,00 mg Nikotinsyra^{NA}, 20,00 mg Ca-pantothenat^{NA}, 600,00 mcg Biotin (3a880)^{NA}, 3,00 mg Folinsyra^{NA}, 100,00 mg Kolin (3a890)^{NA}, 45,00 mg Järn (3b103) (Järn(II)sulfat, Monohydrat)^{NA}, 75,00 mg Mangan (3b502) (Manganoxid)^{NA}, 115,00 mg Zinkoxid (3b603)^{NA}, 20,00 mg Koppar (3b405) (Koppar(II)sulfat, Pentahydrat)^{NA}, 0,45 mg Selen (3b801) (Natriumselenit)^{NA}, 0,90 mg Jod (3b202) (Kalciunjodat, vattenfri)^{NA}, 460,00 mg kiselgur (E 551c)^{TA}
